## Diagram Class Looper

### DB
- dsn: string
- username: string
- password: string
+ connection: PDO

---

+ __construct(string,string,string): void

---

+ getConnection(): PDO
+ selectOne(string,array): null | object
+ selectMany(string,array): null | object
+ insert(string,array): bool | int
+ execute(string,array): bool | int

### Model
# connector: DB
# primaryKey: string

---

+ __construct(string): void

---

+ find(int): null |model
+ all(): null | model
+ delete(): bool
+ save(): bool
+ create(): bool
+ make(array): null | model
+ destroy(int): bool
+ where(string, mixed): array

### State
# table: string
# primaryKey: string
+ name: string

### Line
# table: string
# primaryKey: string
+ kind: string

### Exercise
# table: string
# primaryKey: string
+ title: string
+ states_id: int

---

+ all(): null | model

### Answer
# table: string
# primaryKey: string
+ take: string
+ answer: string
+ fields_id: string
